About Me

With my passion for development, I can make applications that drive engagement and satisfy clients. As my CV and portfolio indicate, I can make user-friendly interfaces and reliable back-end solutions. I would like to use my skills to uplift organizations and create real world impact.

Skills

- Full stack web application with PHP & ReactJS
- Bootstrap and Tailwind
- C# form application with .Net Core
- Console applications in C++ & Java
- Selenium and automation python scripts
- Ionic Angular cross platform mobile app

Education

B.SC. IN COMPUTER SCIENCE
University of Bahrain - 2023

SECONDARY SCHOOL
The Indian School, Bahrain - 2018

SENIOR SECONDARY SCHOOL
The Indian School, Bahrain - 2016

Certifications

- Advanced React - Scrimba
- AWS Certified Cloud Practitioner - Amazon
- Power BI Data Analyst Associate - Microsoft

Work Experience

Freelancing at Upwork   *(March 2023- May 2023)*

Built two projects- Home Car Charger Rental system, and Special Disorders Help App with Member and Admin functions which are both live right now on my portfolio

Internship at Truckly   *(July 2022-September 2022)*

Contributed to the backend using PHP and MySql, where I learnt to use MVC framework and built the (truck) booking and feedback system. Also employed Javascript DOM manipulation and AJAX calls to increase interactivity and improve client user experience

Notable Projects

BlockEstate, Real Estate on the Blockchain
Blockchain app created using NextJS, Solidity, and NFT

- Made use of React-Bootstrap with NextJS and create views by fetching data from the IPFS network
- Learnt how to use the different rendering techniques of NextJS such as periodic static generation, server side rendering, and dynamic paths

PetPrism Pet Shop Portal
Web app created using PHP, bootstrap, JS and MySQL

- Learnt how to create dynamic pages using PHP
- Used ajax functions to get live updates without page reload
- Used Javascript DOM manipulation to create interactive forms

Pharmacy Management System
Web app created using PHP, bootstrap, JS and MySQL

- Learnt how to manage different views for different users. eg: customer, pharmacist, admin
- Tested key features and security flaws to make the webapp production ready for real world usage
- Implemented a database for user information, auction items, and media uploads using MySql

Shaikh Tahmidur Rahman
